Mathematics and Computers in Simulation 32 (1990) 635–638
North-Holland

CONTENTS OF VOLUME 32 (1990)

Numbers 1, 2 (Simulation Society of Australia (Inc) 8th Biennial Conference, 1989), April 1990

Introduction, *A.J. Jakeman (Australia)* 1

Keynote Papers

Epidemic modelling and simulation, *J. Gani (USA)* 3

Construction of hydrological models for natural systems management, *T.G. Chapman (Australia)* 13

Modelling complex natural processes with small observation sets: the case of acidification of surface waters in North America and Europe, *G.M. Hornberger (USA)* 39

Cloud-average concentration statistics, *P.C. Chatwin and P.J. Sullivan (UK / Canada)* 49

Environmental Modelling

New approaches to modelling the global distribution of trace gases in the troposphere, *J.A. Taylor (Australia)* 59

Fumigation modelling – a Lagrangian particle approach, *P. Hurley and W. Physick (Australia)* 65

Simulation of sea water intrusion, *F. Ghassemi, A.J. Jakeman and G. Jacobson (Australia)* 71

Designing artificial lakes as pollution control devices, *R.S. Anderssen, C.R. Dietrich and P.A. Green (Australia)* 77

Modelling the environmental effects of training on a major Australian army base, *S.M. Cuddy, P. Laut, J.R. Davis, P.A. Whigham, J. Goodspeed and T. Duell (Australia)* 83

Modelling the wind flow pattern around a parabolic sand dune, *J.J. Finnigan, D. Neil, B.G. Lees, R.J. Croome and M. Woodgate (Australia)* 89

Offshore bar formation in a shallow water, limited fetch environment, *S. Noble and B. Lees (Australia)* 95

Weather Simulation

Some fundamental questions in stochastic simulation of weather sequences, with applications to ANUCLOUD, *E. Chia (Australia)* 101

Simulation of areally integrated spatial-temporal rainfall field for use in rainfall-runoff models, *M.T. Retnam, B.J. Williams and G. Kuczera (Australia)* 107

Stochastic weather modelling: a phenomenological approach, *L. Guenni, D. Charles-Edwards, C.W. Rose, R. Braddock and W. Hogarth (Australia)* 113

Modelling rainfall as a fractal process, *T. Beer (Australia)* 119

Robust calibration of seasonally varying stochastic weather models using periodic smoothing splines, *M.F. Hutchinson (Australia)* 125

Optimisation and Resource Allocation

Dynamic optimization with multiple objectives and the valuation of public goods of community reservoirs, *S. Mahendrarajah (New Zealand)* 131

Elsevier Science Publishers B.V. (North-Holland)

The economic analysis of public sector forest management using linear programming: Selected results from an Australian application, *D. McKenney and M. Common (Australia)* 137
Modelling tools for water management, *B. Henderson-Sellers and D.R. Gallagher (Australia)* 143
Simulated annealing for a constrained allocation problem, *P.M. Jellett (Australia)* 149
Computational Methods and Engineering Applications
A particle method for a scalar advection diffusion equation, *S. Roberts (Australia)* 155
A model of coupled water, water vapor and heat transport in porous media and a simulation analysis of evaporation, *J.Z. Yang and I. White (Australia)* 161
Percentile estimation of the three-parameter gamma and lognormal distributions: methods of moments versus maximum likelihood, *J. Bai, A.J. Jakeman and J.A. Taylor (Australia)* 167
A comparison of some methods of stochastic modelling of solar energy photovoltaic storage systems, *D.G. Doran (Australia)* 173
A finite element formulation for cables suitable for dynamic modelling, *N. Haritos and D.T. He (Australia)* 179
Estimation Techniques
The estimation variance of the areal mean of a sampled random field, *D.V. Hansen, P.J. Dillon and P.I. Brooker (Australia)* 185
Sensitivity of kriging and spline interpolation to data perturbations, *C.R. Dietrich (Australia)* 191
The effects of misspecification in estimating the percentiles of some two- and three-parameter distributions, *J. Bai, A.J. Jakeman and M. McAleer (Australia / Japan)* 197
The nonparametric estimation of growth curves, *R. Kohn and C.F. Ansley (New Zealand)* 203
Recursive smoothing of environmental time-series, *C.N. Ng and P.C. Young (Hong Kong / UK)* 209
Monte Carlo and other methods for nonlinear non-Gaussian estimation, *P.R. Benyon (Australia)* 215
Ecological System Approaches
Trilogy – three hierarchical models of plant succession, *I.R. Noble, A.D. Moore and T.J. Montgomery (Australia)* 221
A modelling framework for the spatial extension of ecological relations in vegetation studies, *B.G. Mackey and T. Bayes (Australia)* 225
Wildlife management in Australia: New developments and opportunities using computer-based generic models, *T.W. Norton and J.E. Williams (Australia)* 231
A generic approach to landscape modelling, *D.G. Green, R.E. Reichelt, J. van der Laan and B.W. Macdonald (Australia)* 237
Process modelling and geographic information systems: breathing life into spatial analysis, *K.J. Granger (Australia)* 243
Parallel computing in ecological simulation, *D.R.B. Stockwell and D.G. Green (Australia)* 249
Designing a database for coastal planning and management, *J.K. Bowyer (Australia)* 255
News of IMACS 261

Number 3, June 1990

Identifiability and indistinguishability of linear compartmental models, *K.R. Godfrey and M.J. Chapman (UK)* 273

Piecewise-linear approximation of solution of linear differential equations by Walsh functions, *M. Ohkita and Y. Kobayashi (Japan)* 297
Numerical simulation of the nonlinear Schrödinger equation, *T.R. Taha (USA)* 309
Book Reviews, *W.F. Ames and C. Brezinski (USA / France)* 313
News of IMACS 321

Number 4, October 1990

A note on examples of Volterra integral equation with exact solution, *J. Abdalkhani (USA)* 335
A symbolic generator of state equations for modeling of electrical systems, *E.V. Depiante (USA)* 339
Finite-dimensional approach to estimation of functional parameters in a parabolic system, *K. Nakano, I. Tsurumi and S. Sagara (Japan)* 351
Some explicit three-level finite-difference simulations of advection, *J. Noye (Australia)* 359
Optimization of static simulation models by the score function method, *R.Y. Rubinstein and A. Shapiro (Israel)* 373
Analytical and simulation studies of a multiprocessor system for high-speed numerical computations, *C. Siva Ram Murthy and V. Rajaraman (India)* 393
A numeric-symbolic expert system for 2-D and 3-D object recognition in robotic applications, *S. Tzafestas and G. Kechriotis (Greece)* 403
Book Reviews, *W.F. Ames and C. Brezinski (USA / France)* 419
News of IMACS 433

Numbers 5,6 (Parameter Identifications with Error Bound), December 1990

Foreword, *E. Walter (France)* 447
Estimation of parameter bounds from bounded-error data: a survey, *E. Walter and H. Piet-Lahanier (France)* 449
A compact algorithm for the intersection and approximation of *N*-dimensional polytopes, *V. Broman and M.J. Shensa (USA)* 469
Fast and robust algorithm to compute exact polytope parameter bounds, *S.H. Mo and J.P. Norton (UK)* 481
Exact recursive characterization of feasible parameter sets in the linear case, *H. Piet-Lahanier and E. Walter (France)* 495
Recursive membership set estimation for output-error models, *T. Clément and S. Gentil (France)* 505
Recent developments in optimal bounding ellipsoidal parameter estimation, *A.K. Rao and Y.-F. Huang (USA)* 515
Parameter bounding for time-varying systems, *J.P. Norton and S.H. Mo (UK)* 527
Membership-set estimation using random scanning and principal component analysis, *K. Keesman (Netherlands)* 535
A bounded-error approach to accuracy analysis in ellipsometry, *M.K. Smit and J.W. Verhoof (Netherlands)* 545
Characterization of non-connected parameter uncertainty regions, *H. Piet-Lahanier and E. Walter (France)* 553

Identification, structure selection and validation of uncertain models with set-membership error description, *G. Belforte, B. Bona and V. Cerone (Italy)* 561
Experiment design for bounded-error models, *L. Pronzato and E. Walter (France)* 571
Optimal algorithms for system identification: a review of some recent results, *R. Tempo and A. Vicino (Italy)* 585
Bounded-error data, and frequency response design, *B. Kouvaritakis and M.S. Trimboli (UK)* 597
